

WebQ My Courses Development Plan

Goal: Complete a working project by Friday while understanding the important concepts for the interview.

Today's Focus (Next 1 Hour)

- Understand requirements.txt.
- Install backend dependencies.
- Create the Django project.
- Run the development server and verify it works.
- Create the lms app.
- Understand manage.py, settings.py, urls.py and apps.py.
- Write down any questions instead of getting stuck.

Dinner & Break (Until 10:30 PM)

- Eat dinner.
- Take a short walk or stretch.
- Return refreshed at 10:30 PM.

10:30 PM – 11:15 PM

- Configure Django settings.
- Add DRF, SimpleJWT and CORS.
- Run the server again and verify there are no errors.

11:15 PM – 11:45 PM

- Review Django, DRF, JWT, CORS and INSTALLED_APPS.
- Focus on understanding the purpose, not every line of code.

11:45 PM – 12:00 AM

- Update notes.
- If using Git, commit your progress.
- Prepare tomorrow's work.

Tomorrow Morning

- Design database models.
- Create models.py.
- Run makemigrations and migrate.
- Verify models in Django Admin.

Tomorrow Afternoon

- Create seed data.

- Configure JWT authentication.
- Test login and token generation.

Tomorrow Evening

- Build My Courses API.
- Build Course Detail API.
- Build Toggle Completion API.
- Test using Postman or Thunder Client.

Day 3

- Set up React + Vite.
- Configure Tailwind, Router, Axios and React Query.
- Build Login and Dashboard pages.

Day 4

- Build Course Details page.
- Implement Mark as Done.
- Add Search feature.
- Handle loading, empty and error states.
- Deploy backend and frontend.

Friday

- Complete testing.
- Fix bugs.
- Write README.md.
- Write APPROACH.md.
- Clean GitHub repository.
- Submit the assignment.

Golden Rule

- Plan -> Build -> Run -> Test -> Learn -> Continue.
- Don't aim to understand every line immediately. Finish the project first, then deepen your understanding.
